

PREMIUM COFFEE MILL

with conical burr grinder
Quality for the perfect coffee experience

The EKM 600 premium coffee grinder from ROMMELSBACHER combines attractive design with impressive grinding technology and well-thought-out features – a real asset for any budding barista. The optimized conical grinder with metal gearing and 75 grind settings grinds the beans particularly gently at approx. 450 rpm, thus guaranteeing optimal aroma development and individual enjoyment for every taste profile: from extra-fine (espresso) to coarse (French press). A very high grind consistency in the fine particle range (0.355 mm) and modified dead space management (just 0.5 g on the finest setting even without the bellows) for a dense, even and voluminous crema will also appeal to discerning coffee enthusiasts. Our quietest coffee grinder to date boasts even more practical convenience features: a removable grinding unit for easy cleaning, practical filling aids for spill-free dosing into the portafilter, and the magnetic fixing of the portafilter holders round off the premium design of the EKM 600, as do the removable powder outlet and the magnetic surface for storing accessories.

Also for portafilter

Removing residual powder with the bellows

Modular design for easy cleaning

Technical specifications:

- Model: EKM 600
- 220–240 V ~ 150 W• anthracite
- precise setting of coarseness in 75 stages
- grinding time selectable in 35 levels (3–60 seconds)
- also suitable for grinding directly into portafilter
- aroma-preserving grinding at approx. 450 rpm, particularly quiet
- robust, modular stainless steel conical grinder with metal gear and anti-block system
- removable beans container (120 g) with locking system
- removable powder container (90 g) with aroma seal
- grinding stamp and magnetic powder outlet removable
- clever: attachable bellows removes residual powder, with anti-static function
- 4 non-slip silicone feet, cord take-up, magnetic surface for accessories, LED light for perfect visibility
- Includes: 2 portafilter holders (51/54 and 58 mm Ø), 2 filling aids, bellows, cleaning brush
- EAN: 40 01797 010179

Anti-static function
